STOP THE COYOTE KILLING CONTEST NOW in GRAYSON

It won't help lower the number of coyotes

It won't eliminate depredation or "problem" coyotes

It's inhumane, brutal and archaic

It is environmentally unsound

Non-lethal predator control methods do work

"There is not a single documented instance of a bounty program temporarily or permanently reducing coyote populations or livestock depredation problems."
Michael Fries, VA Dept. of Game & Inland Fisheries, Commonwealth of VA.
